Research Profile

My research develops the mathematics of hierarchical structure — non-Archimedean (p-adic) analysis, pseudodifferential operators, and statistical field theory — and, over the past five years, has applied it to the mathematical foundations of deep learning.

The deep learning program treats network architecture itself as a mathematical object rather than as a parameter count. Its principal results are: a rigorous correspondence between deep Boltzmann machines, deep belief networks, and p-adic statistical field theories; a universal approximation theorem for non-Archimedean deep networks, together with an isometric identification carrying the result back to real-valued functions on the interval; a dynamic mean-field theory for continuous random networks, with a criticality condition expressed through the largest Lyapunov exponent; and a rigorous thermodynamic limit for deep and recurrent networks in which the network admits a unique state inside a region of parameter space and infinitely many outside it — a genuine phase transition, whose critical organization in certain cases is described by a strange attractor.

That program rests on twenty-five years of work in analysis, number theory, and mathematical physics: Igusa local zeta functions, Newton polyhedra, and oscillatory integrals for meromorphic functions; Koba–Nielsen string amplitudes and their meromorphic continuation, including generalized Selberg–Mehta–Macdonald and Dotsenko–Fateev-type integrals; pseudodifferential equations over non-Archimedean spaces and the Markov processes they generate; and quantum mechanics over a discrete space, including the

identification of a broad class of p-adic Schrödinger equations as exact scaling limits of continuous-time quantum walks.

I have authored 3 research monographs (Cambridge University Press, Springer, De Gruyter) and more than 80 papers in journals spanning mathematics, mathematical physics, and computation (*Advances in Mathematics*, *Trans. Amer. Math. Soc.*, *J. London Math. Soc.*, *IMRN*, *J. Fourier Anal. Appl.*, *Reviews in Mathematical Physics*, *Nuclear Physics B*, *J. Phys. A*, *Annals of Physics*, *Physica D*, *J. High Energy Phys.*, *Nonlinearity*, *Commun. Number Theory Phys.*), and have supervised 17 Ph.D. dissertations in Colombia, Mexico, and the United States.

Citation metrics: ∼2,000 citations on Google Scholar (August 2026); see my Google Scholar profile.

Education

- D.Sc. Mathematics, 1996, National Institute of Pure and Applied Mathematics, IMPA, Rio de Janeiro, Brazil.
- M.Sc. Mathematics, 1992, Los Andes University, Bogotá D.C., Colombia.
- M.Sc. Electrical Engineering, 1992, Los Andes University, Bogotá D.C., Colombia.
- B.Sc. Mathematics, 1988, National University of Colombia, Bogotá D.C., Colombia.
- B.Sc. Electronics Engineering, 1988, Francisco José de Caldas University, Bogotá D.C., Colombia.

Appointments

- (12/2020 to present) Full Professor of Mathematics with tenure, the University of Texas Rio Grande Valley, United States.
- (2023-2025) Doctoral Faculty, Department of Physics, the University of Texas Rio Grande Valley, United States.

- (04/2016-12/2020) Research Professor level 3D at the Department of Mathematics, Center for Research and Advanced Studies of the National Polytechnic Institute, CINVESTAV, Mexico.
- (01/2013- 03/2016) Research Professor level 3C at the Department of Mathematics, Center for Research and Advanced Studies of the National Polytechnic Institute, CINVESTAV, Mexico.
- (05/2007-12/2013) Research Professor level 3B at the Department of Mathematics, Center for Research and Advanced Studies of the National Polytechnic Institute, CINVESTAV, Mexico.
- (03/2006- 04/2007) Associate Professor of Computer Science and Mathematics, Barry University, Department of Mathematics and Computer Science, Miami, U.S.A.
- (09/2001- 02/2006) Assistant Professor of Computer Science and Mathematics, Barry University, Department of Mathematics and Computer Science, Miami, Florida, U.S.A.
- (10/1997-09/2000) Director of Scientific Computation Laboratory, Autonomous University of Bucaramanga, Colombia.
- (08/1996-09/1997) Assistant Professor of Mathematics, Industrial University of Santander, Department of Mathematics, Bucaramanga, Colombia.
- (09/1991-09/1992). Research Engineer at Institute of Electronics and Communications, ITEC-TELECOM, Bogotá, Colombia.

Awards and Honors

- (2020–2029) Debnath Endowed Professorship in the Mathematical Sciences, the University of Texas Rio Grande Valley (reappointed 2023 and 2026).
- (2016–2025) Member of the National System of Researchers of Mexico (SNI), Investigador Nacional Nivel III (highest level). Nivel II (2012–2015); Nivel I (2007–2011).

- (2014) Regular Member of the Mexican Academy of Sciences.
- (2010) Alejandro Ángel Escobar Medal in Exact, Physical and Natural Sciences, Colombia.
- (2009) Regular Member of the Colombian Academy of Exact, Physical and Natural Sciences.

Grants

- Multiple grants for organizing meetings, conferences, and workshops in France, Germany, Spain, Mexico, and Colombia are not listed here. Please see the list of conferences that I have co-organized.
- (2020-2024) Group grant from Conacyt, Mexico, to conduct research in mathematical biology (Non-conventional mathematical and computational models for the study and analysis of relevant problems in biology). Multidisciplinary research grant.
- (2016-2020) Grant from Conacyt, Mexico, to conduct research in number theory/algebraic geometry, p-adic analysis and mathematical physics (Non-Archimedean Analysis and Geometry and Applications).
- (2011-2014) Grant from Conacyt, Mexico, to conduct research in number theory, algebraic geometry and p-adic analysis (Oscillatory Integrals and Exponential sums in Arithmetic and Complex Systems).
- (2005-2007) Young Investigator Grant, National Security Agency, US, to conduct research in number theory and p-adic analysis (Newton polyhedra, Oscillatory Integrals and Pseudo-Differential Operators Over p-adic Fields).
- Travel Grant from American Institute of Mathematics to attend the Workshop "Numerical Invariants of Singularities and Higher-dimensional Algebraic Geometry," Palo Alto, California, US, July 31st to August 4th, 2006.
- (2003-2004) Grant from Council of Grants and Research, Barry University, Miami, U.S.A, to conduct research in number theory and p-adic analysis (Local zeta functions and p-adic pseudo-differential equations).

- (2000-2002) Grant from COLCIENCIAS (Administrative Department of Science, Technology and Innovation), Colombia, to conduct research in number theory (Local Zeta Functions, non Degeneracy Conditions and Newton Polygons).
- (1998-2000) Grant from COLCIENCIAS (Administrative Department of Science, Technology and Innovation), Colombia, to conduct research in number theory (Local Zeta Functions of quasi-homogeneous polynomials).

Books

1. Zúñiga-Galindo W. A., "*p*-Adic Analysis: Stochastic Processes and Pseudo-Differential Equations." De Gruyter, 2025.
2. Khrennikov Andrei, Kozyrev Sergei, Zúñiga-Galindo W. A., "Ultrametric Pseudodifferential Equations and Applications". Encyclopedia of Mathematics and its Applications 168. Cambridge: Cambridge University Press (ISBN 978-1-107-18882-2), 2018.
3. Zúñiga-Galindo W. A., "Pseudodifferential Equations Over Non-Archimedean Spaces," Lectures Notes in Mathematics 2174, Springer, 2016. ISBN 978-3-319-46738-2.

Selected Publications

Grouped by theme; the complete chronological list follows.

Mathematical foundations of deep learning and neural networks

1. Zúñiga-Galindo, W. A. "Deep Neural Networks: A Formulation via Non-Archimedean Analysis," J. Fourier Anal. Appl. 32 (2026), no. 4, Paper No. 77. *(Universal approximation for hierarchical architectures.)*
2. Zúñiga-Galindo W. A., "Critical Organization of Deep Neural Networks, and *p*-Adic Statistical Field Theories," arXiv:2601.19070, submitted to J. Phys. A. *(Thermodynamic limit; phase transition.)*

3. Zúñiga-Galindo W. A., "Dynamic mean-field theory for continuous random networks," J. Phys. A: Math. Theor. 58 (2025), 12520. *(Criticality via the largest Lyapunov exponent.)*

4. Zúñiga-Galindo, W. A. "A Correspondence Between Deep Boltzmann Machines and p-Adic Statistical Field Theories," Adv. Theor. Math. Phys. 28 (2024), no. 2, 679–741.

5. Zúñiga-Galindo W. A., He C., Zambrano-Luna B. A., "p-Adic statistical field theory and convolutional deep Boltzmann machines," Prog. Theor. Exp. Phys. 2023, no. 6, 063A01.

6. Zúñiga-Galindo, W. A., "p-Adic statistical field theory and deep belief networks," Physica A 612 (2023), Paper No. 128492.

7. Zúñiga-Galindo, W. A., "Non-Archimedean statistical field theory," Rev. Math. Phys. 34 (2022), no. 8, Paper No. 2250022.

8. Zúñiga-Galindo, W. A., and Zambrano-Luna B. A., "Hierarchical Wilson–Cowan Models and Connection Matrices," Entropy 25 (2023), no. 6, 949. *(Cortical dynamics compatible with small-world connectivity.)*

9. Zambrano-Luna B. A., Zúñiga-Galindo W. A., "p-Adic cellular neural networks: applications to image processing," Physica D 446 (2023), Paper No. 133668.

10. Zúñiga-Galindo W. A., Zambrano-Luna B. A., Indoung C., "Pattern Formation in Quantum Hierarchical Cellular Neural Networks," Commun. Nonlinear Sci. Numer. Simul. 163 (2026), Paper No. 110715.

Zeta functions, oscillatory integrals, and string amplitudes

11. Veys W., Zúñiga-Galindo W. A., "Zeta Functions and Oscillatory Integrals for Meromorphic Functions," Adv. Math. 311 (2017), 295–337.

Selected Invited Presentations (2022–2026)

- (6/2026) Local Zeta Functions, String Amplitudes, and Graphs. Sixth International Workshop on Zeta Functions in Algebra and Geometry. 8–12 June 2026, University of Galway, Ireland.

- (6/2026) Quantum Mechanics, Non-locality, and the Space Discreteness Hypothesis. IARD 2026. The 15th Biennial Conference on Classical and Quantum Relativistic Dynamics of Particles and Fields. 8 - 11 June 2026, Howard University, Washington DC.

- (2/2026) Continuous-Time Quantum Markov Chains and p-Adic Quantum Mechanics. Probability and Mathematical Physics Seminar at UC Riverside (UCR), February 10, 2026.

- (12/2025) Statistical Field Theory of Deep Neural Networks: An Ultrametric Approach to Deep Learning. Miami Physics Conference 2025, Dec 12-18, 2025.

- (11/2025) Continuous-Time Quantum Markov Chains and Discretizations of p-Adic Schrödinger Equations: Comparisons and Simulations. Tercera Escuela sobre la Física de los Materiales Cuánticos, November 4-6, 2025, Tuxtla Gutiérrez, Chiapas, México.

- (05/2025) p-Adic Quantum Mechanics, Quantum Walks, and the Discreteness of Space.NONLINEARITY, NONLOCALITY AND ULTRAMETRICITY. International Conference on the Occasion of Branko Dragovich 80th Birthday. 26 - 30/05/2025, Belgrade, Serbia.

- (03/2025) p-Adic numbers, neural networks, deep learning, and statistical field theories. Tercer Encuentro Nacional de Análisis no Arquimediano, Física Matemática y Aplicaciones, Tunja Colombia, March 17-20, 2025.

- (02/2025) p-Adic Boltzmann Machines. Montréal - Guanajuato Workshop on Probability and Machine Learning, Guanajuato, Mexico, February 25-27, 2025.

- (11/2024) The p-Adic Schrödinger Equation and the Two-Slit Experiment in Quantum Mechanics. Physics and Its Applications, PHYSICS 2024, Boston, October 21-24, 2024.

- (06/2024) Quantum Mechanics at the Planck Length. Sixteenth International Conference Application of Mathematics in Technical and Natural Sciences, AMiTaNS24. June 21-26, 2024, Albena, Bulgaria.

- (04/2024) A Correspondence Between Deep Boltzmann Machines and p-Adic Statistical Field Theories. Spring Eastern Sectional Meeting, Special Session on New Trends in Mathematical Physics, Howard University, Washington, DC, April 6-7, 2024.

- (04/2024) p-Adic Numbers, Neural Networks, Deep Learning, and Statistical Field Theories.Spring Eastern Sectional Meeting, Special Session on Artificial Intelligence Emergent From Mathematics and Physics, Howard University, Washington, DC, April 6-7, 2024.

- (03/2024) p-Adic Numbers, Neural Networks, deep learning, and Statistical Field Theory: An introduction. Coloquio de Matemática. Xavierian Pontifical University, Bogotá, Colombia.

- (04/2023) p-Adic Statistical Field Theory and Deep Boltzmann Machines. Workshop on Applied Analysis and Computation, School of Mathematical and Statistical Sciences, The University of Texas Rio Grande Valley (UTRGV).

- (11/2022) p-Adic Neural Networks and Quantum Field Theory. International Conference "New Trends in Mathematical Physics, " (November 7–12, 2022). Steklov Mathematical Institute of Russian Academy of Sciences, Moscow, Russia.

- (11/2022) p-Adic Statistical Field Theory and Deep Belief Networks.5th Annual Meeting, SIAM TX-LA Section, November 4–6, 2022, University of Houston, Houston, TX. USA.

- (10/2022). Graphs, local zeta functions, log-Coulomb gases, and phase transitions at finite temperature. LAGARTOS =Latin American Geometría Algebraica Real and Tropical Online Seminar.

- (07/2022) Ultrametric Diffusion, Rugged Energy Landscapes and Transition Networks. Physics and its Applications, July 18-21, San Francisco, CA, United States.

- (05/2022) Mini course "Introduction to p-adic analysis." CIMPA-CIMAT Research School: p-adic Numbers, Ultrametric Analysis, and Applications, Guanjuato, Mexico.

- (05/2022) Ultrametric diffusion, rugged energy landscapes and transition networks. Coloquio Virtual FMAT-CIMAT. Mexico.
- (03/2022) Ultrametricity: perspectives. International Seminar of Mathematics: Juntos UTRGV-UNAL. United States.

Ph.D. Dissertations Supervised

Postdoctoral Researchers Supervised

Dr. Samuel Estala Arias, Postdoctoral Fellow supported by Conacyt, Mexico (2014–2015).

Selected Organized Conferences

Ten of twenty-two international meetings, schools, and workshops organized or co-organized since 2007.

1. (Jointly with Tristan Hubsch) Special Session on New Trends in Mathematical Physics in 2024 Spring Eastern Sectional Meeting, Howard University, Washington, DC, April 6-7, 2024.

2. CIMPA-CIMAT Research School: p-Adic Numbers, Ultrametric Analysis, and Applications. Guanajuato, Mexico, Mayo 23-31, 2022 (jointly with Trond Digernes).

3. Fifth International Workshop on Zeta Functions In Algebra And Geometry, May 2-6, 2022, Nice, France (jointly with Alejandro Melle Hernandez, Adam Parusiński, Wim Veys, Ann Lemahieu).

4. (Conference's Chairman) Eighth International Conference on p-Adic Mathematical Physics and its Applications, Web Conference, May 17-28, 2021. YouTube Channel of the Conference.

5. First Encounter in Mathematical Biology and p-Adic Methods, (Jointly with Yuriria Cortés Poza, IIMAS, UNAM-Yucatán, and J. Rogelio Pérez Buendía, CIMAT-Mérida.) November 11-13, 2019, CIMAT, Merida, Mexico.

6. p-Adic Analysis, Arithmetic and Singularities, L. Santaló Summer Research School 2019 (Jointly with A. Melle Hernandez, C. Galindo Pastor, J. J. Moyano Fernández), June 24-29, 2019, Santander, Spain.

7. Mini-Workshop on p-Adic Mathematical Physics (Jointly with Sergii Torba), Querétaro, May 13th-15th, 2019.

8. (Conference's Chairman) Sixth International Conference on p-adic Mathematical Physics and Its Applications, Mexico.p-adics2017, Mexico City, October 23rd-27th, 2017.

9. (Jointly with Benjamin Klopsch, Willem Veys, Christopher Voll)Fourth International Workshop on Zeta Functions in Algebra and Geometry, Bielefeld, Germany, May 29th to June 2nd 2017.

10. Organizer of the Special Session of Non-Archimedean Analysis (jointly with Przemyslaw Górka, Alexander Quintero, Enrique Reyes García), in V Congreso Latinoamericano de Matemáticos, Barranquilla, Colombia, July 11th to 15th, 2016.

Editorial and Professional Service

Editorial boards. Scientific Reports (2025–); Axioms (2024–); Turkish Journal of Mathematics (2021–); Journal of Nonlinear Mathematical Physics (2021–); p-Adic Numbers, Ultrametric Analysis, and Applications (2016–); Revista Colombiana de Matemáticas (2011–).

Refereeing. Referee for Proceedings of the Royal Society A; Pacific Journal of Mathematics; Forum Mathematicum; Annals of Physics; Journal of Mathematical Physics; Nuclear Physics B; Journal of Mathematical Analysis and Applications; Machine Learning: Science and Technology; Neurocomputing; Scientific Reports; Physica A; Physica D; Chaos, Solitons and Fractals; among others.

External doctoral committees. Karlsruhe Institute of Technology, Germany (2026); University of Camerino, Italy (2024).

Research seminar. Founder and organizer of the bi-weekly Virtual Research Seminar on Non-Archimedean Analysis and Mathematical Physics.

Teaching and Curriculum Development

More than twenty-seven years of university teaching in Colombia, Mexico, and the United States; over thirty distinct courses. At UTRGV (2021–2026) I have taught fifteen distinct courses across all levels, from Calculus and Linear Algebra through Topology and Complex Variables to graduate Analysis, Algebra, and Analytic Number Theory. I designed and taught **MATH 8335, Deep Learning** (doctoral, 2024), built around the mathematical foundations of deep networks rather than programming frameworks, with individual research projects in place of examinations. At CINVESTAV (2007–2020) I taught graduate courses in Functional Analysis, Real Analysis, Algebraic Geometry, p-Adic Analysis, and Topics in Local Zeta Functions.
